What's New: Key Features in SAP Crystal Solutions 2013

This What's New guide for the 2013 release of SAP Crystal solutions provides a brief overview of key enhancements that have been added to SAP Crystal Server 2013, SAP Crystal Reports and SAP Crystal Dashboard Design since the previous release.

1 Mobile

2 Dashboards

3 Administration & Deployment

Untether your office with access to all of your BI content on your tablets and smartphones.

Mobile: Access your data anywhere and on any device with one mobile app

Mobile solutions are essential in modern business; they can provide you and your team with access to important decision making information when away from the desk. SAP Crystal solutions 2013 include improved mobility features to give you more flexibility, simplicity, and independence from IT.

- SAP BusinessObjects Mobile 5.0 Enhancements
 - Supports all of your BI content from the following clients: SAP BusinessObjects Explorer, SAP Crystal Reports, and SAP Crystal Dashboard Design
 - Interactive SAP Crystal Reports Viewer and the OpenDoc function are now supported in SAP BusinessObjects Mobile
 - QR Code & barcode scan support for mobile devices
- Dashboard support for HTML5
 - With SAP Crystal Dashboard Design now publishing to HTML5, you can view your dashboards on your favorite devices running iOS or Android, allowing you to see key metrics wherever you are
- Interactive SAP Crystal Reports documents supported on your mobile device
 - You can now use your mobile device to access interactive SAP Crystal Reports documents, as well as explore data visualizations

Create dashboard envy in your organization by monitoring performance with dashboards on your mobile devices.

Dashboards: Access actionable data anytime with dashboards

With interactive dashboards, your information is easily understood and actionable. SAP Crystal solutions 2013 includes enhancements to make dashboards more accessible, understandable and visually appealing.

- HTML5 support enables dashboards to reach more devices
- Dashboards now offer language support for right-to-left languages such as Arabic
- Two preview modes have been added: Mobile (Fit to Screen) and Mobile (Original Size)
- New and updated visualizations improve the organization of your dashboard information and views
- Mobile dashboard users now have access to more visualizations and chart views

Administration & Deployment: Get started right away

Get started quickly with configuration wizards and migration tools.

Get more value from your data in less time. SAP Crystal Server 2013 has made it much easier to get set up correctly and quickly, so you can spend more time accessing and engaging with your data – to drive more informed business decisions.

- Simplified deployment and migration tools include the new System Configuration Wizard, which quickly guides administrators through a set of essential post-installation configuration
- Integration with SAP Jam, a new collaboration tool, connects your teams to the analysis they need to get new insights - in the office or on a mobile device
- A new upgrade management tool simplifies third-party user group migration and workflow
 - No need to remap users and groups
 - Automatic checking of required services enable your administrator to easily verify that your software is deployed and running successfully
